

A-4-c-1. Water Features Report

The Water Features report provides estimates of important water features used in land use planning that involves engineering considerations. Water features that are covered include hydrologic soil group, water table, ponding, and flooding. See the document “Water Features Definitions” for definitions of the water features included in the report.

The official copy of the Water Features report is located in an Access database and can be electronically created. The Access database is accessible by every NRCS Hawaii employee who uses Toolkit.

The name of the report is: **MANU – Table K1. Water Features**. To obtain the report from the **Access** database:

- Open Windows Explorer (by typing Flying Window-e).
- Click open your C drive.
- Click open the folder **Field_Office_Tech_Guide**.
- Click open **Section II**.
- On the right screen, double-click the appropriate <island.mdb> file. This will open the Access Database **Soil Reports** window.
- Select one or more map units you are interested in
- Scroll on **Report Name** and select the desired report
- Click **Select Parameters**

Access database reports are also available via the following electronic Field Office Technical Guide (eFOTG) websites: <http://www.nrcs.usda.gov/technical/efotg/> or <http://my.nrcs.usda.gov>
